Ching-Yu Hsu

Berkeley, CA | +1 (510) 809-6275 | walkerhsu0808@gmail.com | LinkedIn: chingyuhsu | Personal-Website

Education

University of California at Berkeley **Aug. 2026 - May 2027**

M.Eng. in Electrical Engineering and Computer Sciences (EECS) *California, U.S.*

- Computer Systems concentration | AI Affinity Group Leader

National Taiwan University (NTU) **Sep. 2021 - Jan. 2026**

B.S. in Electrical Engineering (EE) *Taipei, Taiwan*

- Overall GPA 4.24/4.3 | Overall Rank 5/268 **(Top 2%)** | Academic Excellence Awards, Presidential Award

Experience

Internship in Cloud Computing @ CyberLink **Jul. 2025 - Jan. 2026**

- Automated cloud server health monitoring for **300+** servers using n8n, parallelizing health checks across 20 servers to reduce execution time from 5 minutes to **25 seconds**.
- Deployed product features and drove products from early prototype to commercial release

Internship in Data Engineer @ KKCompany Technologies **Jul. 2024 - Jun. 2025**

- Built a multi-LLM text-to-SQL pipeline leveraging OpenAI and Claude APIs for query generation, verification, and refinement, boosting accuracy from **85%** to **90%**.
- Developed automated ETL pipelines with Airflow and dbt and deployed reproducible infrastructure with Terraform, cutting end-to-end data processing time by **62.5%**

Instructor of Official AI Courses @ National Taiwan University **Aug. 2025 - Jul. 2026**

- Delivered courses on Agentic AI for **500+** students, achieving a **4.5/5** satisfaction rating
- Built an AI agent to autonomously optimize prompt injection defenses, improving defense performance by **30%**
- Developed an agentic system leveraging LLM tool calling to automate calendar event creation and participant communication through Google Calendar and Gmail APIs

Teaching Assistant @ Machine Learning Courses **Jan. 2025 - Jan. 2026**

- Developed an AI grading platform serving 1,100+ students, achieving **200ms latency** under 1,100+ concurrent users
- Implemented a GPU-aware worker pool with dynamic slot scheduling, achieving up to **4x higher throughput**

Founder @ EEvolution **Aug. 2023 - Aug. 2024**

- Managed a **30+** member team to organize industry workshops (BenQ, Line), coordinated Corporate Sharings (Amazon, Google, NXP, WorldQuant, Dell), and hosted company visits, fostering hiring opportunities

Project

Enterprise LLM Platform (Industry-Sponsored Capstone) **Sep. 2026 - Now**

- Built an on-premises LLM platform that enables enterprises to securely deploy, manage, and customize LLMs without sending sensitive data to external cloud providers

Efficient Vision Language Models **Jul. 2024 - Jan. 2026**

- Designed an efficient multimodal LLM for visual question answering (VQA) using motion-vector-based token pruning, reducing input tokens by **87%** while maintaining accuracy within **2%** of the original model

Co-Evolution Framework for Detecting Prompt Injections **Jul. 2023 - Jan. 2026**

- Built an automated attacker–defender co-evolution framework for LLM security evaluation, improving detection accuracy from 64% to **84%** on 300+ real-world attacks

CaRPG: in-car AI RPG game connecting with sensors **Mar. 2024 - Jun. 2024**

- Developed an AI-powered in-car RPG system leveraging GPT for dynamic story generation and camera-based vision input to create immersive narratives from surrounding views
- **First Place** at the 2024 MakeNTU Hackathon AUO Enterprise Award among 40+ people

Technical Skills

Languages	Python • C • C++ • Golang • Java • JavaScript • TypeScript • Dart
AI / ML	PyTorch • scikit-learn • Large Language Models (LLMs) • Vision Language Models (VLMs) • RAG • AI Agents
Backend	FastAPI • Flask • Gin • Node.js • React • RESTful APIs • GraphQL • gRPC
Infrastructure	Docker • Kubernetes(K8s) • Terraform • Kafka • Git • CI/CD • Linux • n8n
Cloud & Data	Amazon Web Services (AWS) • Google Cloud Platform (GCP) • BigQuery • MongoDB • Apache Airflow • dbt
